

Enterprise SSDs

Powering Reliable Performance

Transcend's enterprise SSD is designed for demanding business applications, offering DWPD=1 under enterprise workloads for exceptional endurance and reliability. With low latency, it ensures rapid data access and consistent performance for critical workloads. Backed by a 5-year warranty, it provides durability and peace of mind, making it the ideal solution for enterprise environments requiring speed, reliability, and long-term performance.

Enterprise TLC NAND Flash

eTLC, with 7K PE cycles, offers significantly higher endurance compared to standard TLC with 3K PE cycles.

Quality of Service

QoS provides consistent performance across diverse enterprise applications

Hardware Power Loss Protection

Power Loss Protection ensures data integrity and reliability.
